

2

GRADIENT SECTION

2.2 kilometres

6 metres wide.

Hotmix surface.

5 to 10% decline on first section

Even 5% incline for the remainder.

Can be linked to Highway Circuit and 2nd Class Road to significantly increase testing distance.

A typical winding Australian road
Can be closed to operate in the opposite direction if required

Suitable for use in testing by cars, trucks, buses and motorcycles for:

- component and vehicle durability and general development.
- engine retardation, engine torque and general driveability.
