## VEHICLE HANDLING (GRAVEL)

Two areas each approx 1 kilometre in length.

Several flat gravel roads, includes:

- curves of various radii and straight sections of several hundred metres.
- 1 large flat area.
- 1 x 30 metre long x 3 metre wide hotmix section to allow split braking on gravel and bitumen.
- different surfaces including coarse aggregate and fine gravel.

Suitable for use by cars, trucks, military vehicles, motorcycles for ABS system, traction control systems, electronic stability program systems and suspension development.
